

i work as a flight attendant for united airlines and am concerned regarding the proposed use of cell phones in flight. to my knowledge there is no proof they do not interfere w/ navigation, the stress placed on other passengers in an already small area forced to listen to other's conversations w/ no place to get away are enough of a worry. add to that the possibility of use by terrorists in flight or the difficulty if an emergency evac is necessary and people are on their phone instead of listening to important information, is enough to cause sleepless nights! please do not agree to this... it would make me concerned for my safety in my job. thank you for your attention to this matter.
